

Mathematical Statistics

This Book is the second edition that intended to be textbook studied for undergraduate/ postgraduate course in mathematical statistics.

In order to achieve the goals of the book, it is divided into the following chapters. Chapter One introduces events and probability review. Chapter Two devotes to random variables in their two types: discrete and continuous with definitions of probability mass function, probability density function and cumulative distribution function as well. Chapter Three discusses mathematical expectation with its special types such as: moments, moment generating function and other related topics. Chapter Four deals with some special discrete distributions: (Discrete Uniform, Bernoulli, Binomial, Poisson, Geometric, Negative Binomial and Hypergeometric) with their mathematical formulas of p.m.f., C.D.F. and m.g.f. Chapter Five deals with some special continuous distributions: (Uniform, Normal, Exponential, Gamma and Beta) with their mathematical formulas of p.m.f., C.D.F. and m.g.f. Many solved examples are intended in this book (obtaining mean and variance of distributions by m.g.f.). Chapter Six introduces univariate discrete and continuous transformations, i.e., one dimensional variables and their yielding probability distributions. Chapter Seven devotes to truncation of distributions from left, right or both sides, beside the probability distribution of order statistics. Chapter Eight discusses mathematical features of joint, marginal and conditional distributions, as well as independency via covariance and correlation of bivariate distributions. Chapter Nine deals with some special topics such as getting distribution for some transformation from multidimensional random variables by using moment generating function (m.g.f.) and cumulative distribution function (C.D.F.) Many solved examples (about 100) are intended in this book, in addition to a variety of unsolved related problems (about 150) at the end of each chapter to enrich the statistical knowledge of our readers.

Second Edition (October. 2022)

Contents

CHAPTER One

Events & Probability	1
1.1 Introduction	1
1.2 Review	1
1.3 Axioms of Probability	2
1.4 Mutually Exclusive	4
1.5 Independent Events	4
1.6 Conditional Events	5
1.7 Exercises	7

CHAPTER Two

Random Variable	9
2.1 Introduction	9
2.2 Random Variable	10
2.3 Probability Mass Function (p.m.f.)	10
2.4 Probability Density Function (p.d.f.)	16
2.5 Cumulative Distribution Function (C.D.F.)	19
2.6 Exercises	29

CHAPTER Three

Mathematical Expectation	32
3.1 Introduction	32
3.2 Properties of Mathematical Expectation	34
3.3 Some Special Mathematical Expectation	40
3.4 The relationship between central moment and raw moments	42
3.5 The Moment Generating Function (m.g.f.)	47

- 3.6 Factorial Moment Generating Function (f.m.g.f.) 49
- 3.7 The Central Moment Generating Function (a.m.g.f.) 51
- 3.8 The Characteristic Function 57
- 3.9 The mode and Median of Distribution 58
- 3.10 Exercises 64

CHAPTER Four

Discrete Probability Distributions 67

- 4.1 Introduction 67
- 4.2 Discrete Uniform Distribution 68
- 4.3 Bernoulli Distribution 72
- 4.4 Binomial Distribution 75
- 4.5 Poisson Distribution 80
- 4.6 Geometric Distribution 85
- 4.7 Negative Binomial Distribution 90
- 4.8 Hypergeometric Distribution 95
- 4.9 Exercises 101

CHAPTER Five

Continuous Probability Distributions 106

- 5.1 Introduction 106
- 5.2 Continuous Uniform Distribution 106
- 5.3 Normal Distribution 112
- 5.4 Exponential Distribution 120
- 5.5 Gamma Distribution 125
- 5.6 Beta Distribution 133
- 5.7 Exercises 137

CHAPTER Six**Transformations 106**

- 6.1 Discrete Random Variable 106
- 6.2 Continuous Random Variable 106
- 6.7 Exercises 137

CHAPTER Seven**Truncated Distributions and Order Statistics**

- 7.1 Truncated Distributions
- 7.2 Order Statistics
- 7.3 Exercises

CHAPTER Eight**Joint, Marginal and Conditional Distribution**

- 8.1 Joint probability function
- 8.2 Marginal probability function
- 8.3 Conditional probability distribution
- 8.4 Cumulative probability of joint distribution
- 8.5 Covariance of distribution
- 8.6 Correlation of distribution
- 8.7 Exercises

CHAPTER Nine**Distribution of Two Variables**

- 9.1 Discrete Variables
- 9.2 Continuous Variables
- 9.3 Special Topics

Contents***Mathematical Statistics***

9.3.1 **Moment Generating Function in Multiple Transformation**

9.3.2 **Cumulative Distribution Function in Multiple Transformation**

9.4 **Exercises**
